

How to Get Your AWS Educate Credits

Machine Learning Engineering Career Track

Springboard is delighted to partner with AWS Educate to offer \$50 in AWS credits for every student in our Machine Learning Engineering Career Track. You can use these credits as necessary for your capstone project.

You should be receiving an email from AWS Educate Support letting you know that your educator has invited you to join AWS Educate and access a "Classroom" for your course work. Towards the end of the email, it will prompt you to click to complete the application process.

Steps to Get Your AWS Credits

Take care when filling out this profile, as you can only do it once.

1. Follow the link towards the end of the email from AWS Educate support.
2. Make sure to type in 'Springboard' as the school/course you are taking.
3. For the completion date, input your cohort start date for the day/month. (E.g if you're in our April 1st cohort, select 04/01.)
4. For the year, select an end date that has not passed yet. (E.g if the year is 2019, select 2022.)

5. After you have submitted your AWS Educate application, you will be sent an email asking you to verify your email address. Follow the link to confirm the correct email address you'd like to use when accessing the platform.

Last, you'll receive a final email congratulating you on an approved application. You'll be prompted to set your password and login info for the AWS Educate Student Portal. Feel free to bookmark the website for easy access.

Best of luck moving forward!
